Introduction

Welcome to the world of **$TONGS** where fire meets finance and memes meet meaning. $TONGS is a Solana-based meme coin created for those who believe that crypto should be fun, fair, and just a little bit spicy. Inspired by community spirit and built with full transparency, $TONGS isn't just a coin it's a movement powered by flavor, memes, and the eternal flame of **The Grill Boss**.

The $TONGS token is designed with a focus on long-term sustainability and community fairness. With mechanisms like reflection rewards and anti-sniping fees, the project aims to reduce whale and sniper influence while building a strong, engaged community. Our anti-sniping policy makes sure that no single wallet can dominate the supply early, promoting a fairer and more decentralized market.

This whitepaper is your full guide to the $TONGS ecosystem, values, and vision. Lets get grilling.

$TONGS Tokenomics

- **Token Name:** $TONGS
- **Contract Address:** 8Bq7ZwSB42Tdijr5zsArkWiZT7ea8AWqZTSVbFuTgxJq
- **Total Supply:** 869,000,000

Token Distribution:
- **LP Provision:** 80% (695,200,000) – Provided gradually to the Meteora DAMM v2 pool over the next 30 days. (DAMM v2 does not use transferable LP tokens; liquidity is stored in-position and is visible on-chain.) LP position is locked for 3 months.
- **Dev Reserve:** 10% (86,900,000) – Fully locked for 3 months.
- **Marketing Team:** 10% (86,900,000) – Available to fund development, growth, and future project activities.

$TONGS Tokenomics

Locked Supply:
- 695,200,000 (80%) – Allocated for liquidity (scheduled deposits over time to DAMM v2 pool).
- Note: DAMM v2 liquidity cannot be "locked" via LP tokens; it is held as a non-transferable locked position.

Liquidity Distribution:
- Liquidity is added in scheduled partial deposits to the DAMM v2 pool.
- DAMM v2 does not generate SPL LP tokens, so traditional LP locking does not apply. Instead, the position is locked.
- LP Position: 100% Non-permanently locked for 3 months
- Cliff Date: 20/02/2026 07:28 UTC
- Vesting end: 22/05/2026 07:28 UTC

Developer Allocation:
- 86,900,000 (10%) – 100% locked for 3 months.

Marketing Allocation:
- 86,900,000 (10%) – Fully available for marketing, partnerships, and ecosystem expansion.

Transaction Fees:
- 1% per transaction

Reflection:
- 1% redistributed proportionally to all active holders who keep $TONGS for at least 3 months, distributed from the Reflections Wallet.

Pool Launched:
- Meteora DAMM v2 (Dynamic Liquidity Engine)

$TONGS Values

We believe in:

- **Fair distribution:** no pre-sale, no private allocations
- **Community governance:** the Grill Council leads the way
- **Fun and virality:** memes are our fuel
- **Transparency:** from token burns to dev locks, its all on-chain

$TONGS Vision

$TONGS represents more than just a token **its a philosophy**: that memes have power, fairness builds trust, and a well-cooked idea always tastes better.

With a unique brand identity and a fiery approach, $TONGS aims to sizzle across Solana and beyond.

Anti-Sniper Mechanisms & Penalties

Protecting Honest Holders. Fighting Greedy Bots.

At **$TONGS**, we believe in a fair, ethical, and fun trading experience. This project is built for real people — not for predatory bots or exploiters.

That's why we've implemented a smart, **multi-layered anti-sniper and anti-whale defense system** to keep trading safe and balanced for our holders.

✖ What We Block in Launch

1. Sniper Bots & Smart Contracts
Automated contract wallets and bot tools attempting to interact with $TONGS are automatically rejected. Only human-controlled wallets can trade — smart contracts are disallowed.

2. Suspicious Speed Traders
We monitor transaction speed and frequency. If a wallet submits transactions too quickly or in unnatural repetition, our system automatically flags and penalizes it.

3. Pattern-Based Exploits
Bots that attempt to execute transactions in identical amounts and time intervals are identified as malicious. These behaviors are punished with escalating penalties and eventual blacklisting.

⚠️ How Penalties Work

We apply a tiered fee system based on bot's behavior.
- Fee Scheduler
- Rate Limiter

🚫 **Blacklisting is permanent and cannot be reversed.**

✅ How to Avoid Penalties

Real holders and traders don't need to worry. Just follow these basic principles:
- Don't use sniper bots or auto-trading tools.
- Avoid rapid or repeated trades within short time windows.
- Be human — trade organically.
- Enjoy the token. It's designed to reward patience, not speed.

💬 Why This Matters

This system protects:
- ✅ Early buyers from bots draining liquidity
- ✅ The integrity and fairness of the $TONGS ecosystem
- ✅ The community from bad actors and market manipulation

We're not just a meme token — we're building a **safe space for real people**.

🎁 Quarterly Rewards for Holders

If you **hold your $TONGS for 3 months**, you automatically earn monthly reflections (rewards) — no staking, no claiming, no hassle. Just hold and enjoy.

🔥 Join the Grill Gang

- We're flipping the table on greedy bots. $TONGS is the meme coin that rewards loyalty, defends fairness, and puts its community first.
- If that sounds like your kind of project — **welcome to the Grill Gang.**

⚖️ Accountability & Acceptance

By interacting with the $TONGS token, you acknowledge and accept that:

- Penalties are enforced to ensure fairness and protect the ecosystem.
- The development team is not responsible for losses caused by bot behavior.
- You are fully responsible for your trading activity.

Liquidity Policy

At **$TONGS**, we prioritize long-term trust and transparency. Our liquidity strategy is designed to protect holders, prevent rug pulls, and encourage stable growth.

💧 Liquidity Plan

- **Liquidity Pair:** TONGS/SOL (Meteora Dynamic v2)
- LP will be added gradually over 14 deposits.
- The LP Wallet holding the 80% of TONGS will stay unlocked so the LP deposits can take place.
- No team sells, no VC, no presale

💧 **Liquidity Distribution** (of total 695,200,000 $TONGS)

🚀 Launch Phase 1: Initial Launch LP (Day 0)

Initial Liquidity: 15,000,000 TONGS + 0.5 SOL

Then:

🚀 Initial Liquidity: 15,000,000 TONGS + 0.20 SOL

🚀 Initial Liquidity: 20,000,000 TONGS + 0.20 SOL

🚀 Initial Liquidity: 30,000,000 TONGS + 0.20 SOL

🚀 Initial Liquidity: 40,000,000 TONGS + 0.20 SOL

🚀 Initial Liquidity: 30,000,000 TONGS + 0.20 SOL

🚀 Initial Liquidity: 40,000,000 TONGS + 0.20 SOL

🚀 Initial Liquidity: 55,000,000 TONGS + 0.20 SOL

🚀 Initial Liquidity: 70,000,000 TONGS + 0.20 SOL

🚀 Initial Liquidity: 85,000,000 TONGS + 0.20 SOL

🚀 Initial Liquidity: 100,000,000 TONGS + 0.20 SOL

🚀 Initial Liquidity: 120,000,000 TONGS + 0.20 SOL

🚀 Initial Liquidity: 70,000,000 TONGS + 0.20 SOL

🚀 Initial Liquidity: 75,200,000 TONGS + 0.20 SOL

🔓 **Liquidity Security**

- DAMM v2 uses locked internal positions instead of LP tokens.
- Liquidity cannot be transferred or rugged.
- All liquidity is visible on-chain

🔄 **Trading Access**

- **The LP remains fully open for trading** – anyone can buy or sell $TONGS on Jupiter, Axiom, Photon and other terminals at any time.
- Transaction fees and reflection payouts will continue to operate normally. Locking the LP does not interfere with reflections or with converting dev fees to SOL.
